

# Plantskydd Animal Repellent - Agricultural Applications

## Plantskydd®

**REPELLENT**

**DEER • RABBITS • VOLES**

### Why is Plantskydd Repellent the #1 choice of Professional Growers?

- **PROVEN** by independent research to out-last and out-perform all other repellents—up to 6 months over-winter!
- **EFFECTIVE** against: deer, rabbits, voles, elk, moose, squirrels, chipmunks and many other animals.
- **ORGANIC**— **OMRI Listed!** Approved for use in the production of organic food by the Organic Materials Review Institute.
- **SAFE** for use on food crops - EPA exempt (25b).
- **RAIN-RESISTANT**—no need to re-apply after every rainfall or irrigation.
- **3 FORMULATIONS** for maximum effectiveness and convenience.
- **BONUS!**—built in fertilizer (12 Nitrogen)
- **Not Harmful** to animals or the environment

*Plantskydd* Repellent was originally developed in Sweden, to provide 6 month over-winter protection from excessive deer browse damage to forestry plantations. Now **made in the USA**, *Plantskydd* is proven to be the **most effective, longest lasting** animal repellent available.

*Plantskydd* works by emitting an odor that animals associate with predator activity, and can be used to **protect a wide variety of crops** from costly browse damage by deer, rabbits, voles and many other destructive animals.

The first repellent to be **OMRI listed “Organic”**, *Plantskydd* is also **EPA exempt (25b)** and is **safe for use on food crops**. *Plantskydd* provides year-round protection of row crops, berries, fruit & nut trees, vineyards, and many other types of valuable crops.

Unlike other repellents which lose effectiveness after rainfall or irrigation, *Plantskydd* is **rain-resistant** and does not require constant re-application.

Professional growers across North America use *Plantskydd* Repellent to **successfully mitigate crop damage** and **maximize yields**.

# Plantskydd Animal Repellent - Technical Data

## Row Crop Applications

For best results *Plantskydd* Powder Concentrate formulation is recommended. Boom sprayers are most commonly used to apply a 30 foot perimeter around the outer edge of the crop, spraying the plants directly.

### Example plot of 50 Acres treated with Plantskydd Repellent

\*In this example the perimeter amounts to 4 acres of coverage area treated with *Plantskydd*.  
 \*4 acres requires 14 lbs of *Plantskydd* and 40 gallons of water for 2-3 weeks of protection.  
 \*Total cost to protect 50 acres = \$200.00 \*Total cost per acre = \$4.00

Dilution Rates - Powder Concentrate			
<b>Protection Time Frame</b>	2-3 weeks	3-6 weeks	Long term (Up to 6 months on dormant plants)
<b>Dilution Rate</b>	3 gallons of water per pound of <i>Plantskydd</i>	2 gallons of water per pound of <i>Plantskydd</i>	1 gallon of water per pound of <i>Plantskydd</i>

## Formulations

- Powder Concentrate
- Granular
- RTU Liquid

## Equipment

- Boom sprayers
- Truck mount sprayers
- Air blasters
- Aerial sprayers
- Backpack sprayers

## Active Ingredient

- Dried Blood (porcine and/or bovine) 99.84%

## Inert Ingredients

- Vegetable oil 0.16%

## Product Attributes

- Environment Friendly
- Non-Toxic
- Not harmful to animals
- Rainfast in 24 hours
- No synthetic additives

## Timing

For best results, apply *Plantskydd* at emergence or prior to when browse damage is expected to occur. Treating crops before animals are habituated to feeding in the area will provide maximum effectiveness.

Although re-application is not required after rain or irrigation, treatment after significant amounts of new growth may be required if animal browsing persists throughout the growing season. Spray until flowering.

## Application and Mixing

- \*Coverage is 10 gallons of solution per acre.
- \*apply when temperatures are above freezing for long term protection.
- \*allow for drying time of 24 hours before irrigation or rainfall.
- \*apply when plants are dry.
- \*a paint paddle mixer and drill are recommended for mixing.
- \*view mixing video on our Youtube channel - *Tree World Plant Care Products*
